

HENRY

Mwangi Chege

About Me

I am an IT professional with experience in various technical roles, including IT support, design, software development and web development. With skills in programming and web development include delivering full-code solutions using technologies listed in my skills list. I have a strong aptitude for solving complex technical challenges. With all my experience, I have developed a deep understanding of the work environment and remain dedicated to delivering high-quality results that meet industry standards and organizational goals.

Accomplishments

System Migration & Data Engineering

- Successfully led a large-scale legacy-to-modern system migration supporting 200,000+ clients, delivering 100% data integrity through rigorous data collection, cleansing, validation, and preparation processes.
- Designed and executed complex SQL migration scripts, significantly reducing transition time while enabling a seamless and low-risk system cutover.
- Ensured business continuity by maintaining and supporting legacy systems during the migration phase while actively driving adoption of modern platforms and technologies.
- Streamlined data integrity workflows, preparing highly complex datasets for integration into modern, scalable systems.

Full Stack Development

- Architected and delivered scalable backend systems using JavaScript, Laravel, PHP, and MySQL, building reliable APIs for high-traffic, production-grade applications.
- Developed modern, high-performance front-end interfaces using Vue.js, React, and Next.js, enhancing user experience and ensuring seamless integration with RESTful and GraphQL APIs.
- Implemented robust authentication and security mechanisms including OAuth2 and JWT, achieving full compliance with industry-standard data protection and access control requirements.

Cloud Infrastructure & DevOps

- Deployed and managed cloud-native microservices on AWS and Azure, leveraging Docker and Kubernetes to achieve high availability, scalability, and fault tolerance.
- Optimized CI/CD pipelines using GitHub Actions and GitLab CI, reducing deployment cycles and automating testing and quality assurance processes.
- Led performance optimization and critical bug resolution efforts, delivering updates that improved system reliability, reduced latency, and enhanced overall application stability.

Technical Support & Operations

- Provided on-site IT support at Makomboki Tea Factory, ensuring uninterrupted operation of computer systems and networks.
- Installed, configured, and maintained hardware and software systems; proactively diagnosed and resolved technical issues across diverse environments.
- Delivered end-user training on systems and workflows, improving operational efficiency and reducing recurring support requests.
- Maintained accurate IT support documentation and ticket records, contributing to structured and efficient technical operations.

Work Experience

ICT Officer | Fullstack Developer | Database Administrator
CARITAS - Nairobi Jan 2025 – Current

System Migration & Data Engineering

- Orchestrated a massive legacy-to-modern system migration for 200,000+ clients, leading data collection, cleansing, and preparation strategies that ensured 100% data integrity.
- Engineered and executed complex SQL scripts to migrate critical data assets, reducing transition time and ensuring a seamless cutover to the new platform.
- Bridge-managed legacy system support while driving the adoption of new technologies, ensuring business continuity and minimal downtime during the transition phase.

Full Stack Development

- Architected scalable backend systems using JavaScript, Laravel, PHP, and MySQL, delivering robust APIs that power high-traffic applications.
- Built high-performance frontend interfaces using Vue.js, React, and Next.js, optimizing user experience (UX) and seamlessly integrating with RESTful and GraphQL APIs.
- Implemented advanced security protocols, including OAuth2 and JWT authentication, achieving full compliance with industry data protection standards.

AWS	
Laravel/PHP	

Cloud Infrastructure & DevOps

- Deployed and managed cloud-native microservices on AWS and Azure, utilizing Docker and Kubernetes to achieve high availability and auto-scalability.
- Optimized CI/CD pipelines using GitHub Actions and GitLab CI, reducing deployment times and automating quality assurance checks.
- Spearheaded performance tuning and bug resolution, delivering critical updates that improved system reliability and reduced latency.

ICT - Intern

CARITAS - Nairobi

June 2024 - Dec 2024

- Facilitated critical system migrations by executing rigorous data collection, cleansing, and preparation protocols to ensure seamless transitions.
- Maintained legacy system stability and operational continuity, providing technical support while driving the adoption of new technologies.
- Streamlined data integrity processes, preparing complex datasets for integration into modern platforms.
- Resolved technical challenges in a dynamic IT environment, bridging the gap between legacy infrastructure and modern solutions.

Designer

January 2024 - May 2024

Write The Docs Kenya

Collaborating as a volunteer designer for Write the Docs Kenya, contributing to knowledge-sharing and community development within the technical documentation field. Designing engaging visual materials, including presentations, social media posters, and educational resources to enhance the clarity and accessibility of technical documentation. Applying design principles to promote user-friendly interfaces and ensure a positive learning experience for the target audience.

IT Support - Industrial Attachment

May 2023 - July 2023

KTDA | Makomboki Tea Factory

Provided on-site IT support at Makomboki Tea Factory, ensuring optimal functionality of computer systems and networks. Installed and configured hardware and software, proactively diagnosed and resolved diverse technical issues, and effectively trained end-users on systems and procedures. Maintained comprehensive documentation of support tickets, contributing to the smooth and efficient operation of the factory's technological infrastructure.

Voting Clerk

August 2022

IEBC | Nairobi

Having worked as a voting clerk, I've developed a keen eye for detail and a strong sense of responsibility when it comes to ensuring accuracy and fairness. My experience with tasks like managing voter registration, administering ballots, and upholding the integrity of the electoral process has sharpened my communication, problem-solving, and conflict resolution skills. I'm passionate about democracy and civic engagement, and I believe these experiences have equipped me to be an effective and reliable member of any team or organization.
